Stefan Vogenauer's *Genealogy of Concept Since 1840* is a major contribution to the history of international law. Vogenauer argues that the concept of international law has been shaped by a series of historical contingencies, beginning with the rise of the modern state system in the 17th century. He traces the development of the concept through the 19th and 20th centuries, showing how it has been influenced by changes in political thought, diplomacy, and warfare.

Vogenauer's book is a valuable resource for scholars of international law, history, and political science. It is also a timely contribution to the ongoing debate about the future of international law in the 21st century.
